

TECHNICAL COURSE

From gravure to *flexographic printing*

Flexographic printing has overtaken gravure printing in a big range of applications. Several factors, including sustainability, cost, ink type and more need to be considered before choosing between flexo and gravure printing.

If you are thinking about adopting the flexographic printing technology this training course will allow to understand and learn the advantages and limits of the transition.

28 - 29 February 2024

Comexi Asia-Pacific hub in Bangkok (Thailand)

Addressed to Owners, Managers, Responsibles for the printing process, and Technical staff.

Price: 250EUR (9600 Baht)

Register here to attend

Program

28/02	Contents	
09:00 - 09:10	Welcome and program presentation	
09:10 - 10:00	Transition from gravure to flexo, advantages and limits	T
10:00 - 11:00	Fundamentals and control of variables in flexographic printing Adhesives, plates and anilox	T
11:00 - 11:15	Coffee break	
11:15 - 13:30	Key elements of flexographic machine	T
13:30 - 14:30	Lunch	
14:00 - 15:30	Prepress I: Color management in flexo (Connection with Girona)	T/P
14:30 - 15:30	Prepress II: ECG and Color adjustment process	T/P
29/02	Contents	
09:00 - 10:30	Productivity efficiency: Organization of the production plant for an efficient production	T
10:30 - 10:45	Coffee break	
10:45 - 12:00	Production costs comparison	T
12:00 - 13:00	Practical session: Analysis of real jobs samples, gravure and flexo	P
13:00	Closure	

T - theoretical P - practical
