Lamination troubleshooting

The main defects in lamination, their causes and possible solutions are covered in this online training:

Curling, tunnelling, mist, orange peel, marbling effect, CO2 bubbles (in barrier structures), telescopic effect, wrinkles in the reel, ink bleed, poor bond strength and adhesive with residual “tack”.

The Comexi lamination specialist will be at your disposal to answer any questions or doubts you may have.

Our trainers:

Borja Benavente
Laminating specialist

Eduard da Silva
Laminating specialist
