

Webinar

Laminating troubleshooting: Defects & solutions

Do you want to improve your laminations?
Do you have lamination defects difficult to solve?

 **December 10th at 14:30h (GMT+1)**

 **1.5 hours**

 **English language**

 **Digital certificate on attendance.**

Limited number of attendees.

 **210 EUR**

The main defects in lamination, their causes and possible solutions are covered in this online training:

Curling, tunnelling, mist, orange peel, marbling effect, CO₂ bubbles (in barrier structures), telescopic effect, wrinkles in the reel, ink bleed, poor bond strength and adhesive with residual “tack”.

The Comexi lamination specialist will be at your disposal to answer any questions or doubts you may have.

Register by clicking on the [registration link](#). We will contact you to complete registration details and information.
